

Bart Olsthoorn

Ph.D. in Physics · Product Engineer at Flower

Stockholm, Sweden · bart.olsthoorn@gmail.com · bartolsthoorn.nl · github.com/bartolsthoorn · [linkedin](#)

Profile

Software engineer with a physics Ph.D., now building product and infrastructure for distributed energy assets: batteries, solar, EVs, heat pumps. Equally comfortable building products, leading a small team, or training a model.

Experience

2023 – now	<u>Flower</u> Stockholm · Go, AWS
Feb 2026 – now	Product Owner / Product Engineer · Distributed Assets Leveraging AI to build our systems while supporting the team on business meetings and prioritisation.
Dec 2024 – Feb 2026	Software Engineer · Distributed Assets Developed Flower Bridge, the integration API for distributed energy assets: residential and C&I batteries, solar, EVs, heat pumps.
Jan 2024 – Dec 2024	Engineering Manager (interim) · Asset Management Technical recruiting and team leadership during a growth phase.
Feb 2023 – Jan 2024	Software Engineer · Asset Management Built a platform supporting the Nordic electrical grid with grid-scale solar and battery systems.
2012 – 2017	Freelance Software Engineer Stockholm, Sweden and Leiden, The Netherlands Shipped production software across a range of stacks and domains: early generative AI with PyTorch / GANs at <i>Similar.ai</i> ; Ruby and Elixir work on search, recommendations, and deduplication at <i>Universal Avenue</i> (now Velory); scalable Rails SaaS at <i>InnerBalloons</i> (acquired by Xext) and web-data systems at <i>Pointer Brand Protection</i> .

Education

2018 – 2023	Ph.D., Physics · KTH Royal Institute of Technology Thesis: <i>Homology and machine learning for materials informatics</i> . 11 peer-reviewed publications.
2015 – 2018	M.Sc., Computational Physics · Stockholm University

Selected publications

2023	Persistent homology of quantum entanglement Physical Review B · Editors' Suggestion · link
------	--

2019

Band gap prediction for large organic crystal structures with machine learning

Advanced Quantum Technologies · [link](#)

Open source

500+ stars across repositories on github.com/bartolsthooorn. Highlights: [NVDSP](#) — iOS / macOS audio DSP library (417★); [NQS-numpy](#) — neural-network quantum states in NumPy (35★); [gohighs](#) — Go bindings for the HiGHS optimizer.

Skills & languages

Core	Go, Python, AWS, Databricks, PostgreSQL, distributed systems, product engineering
Past	Ruby / Rails, Elixir, PyTorch, Swift / Objective-C
Research	Machine learning for materials, topological data analysis, quantum systems
Languages	English, Dutch (native), Swedish (working)
